

Hitachi EG110R 360° Rotate 12 tonne Tracked Dumper

Key points:

- 360 degree rotate
- 12 tonne carrying capacity
- Scow end skip body
- Rubber tracks
- Ground pressure when fully laden only 6.2 PSI

Technical info:

- Total width 3000mm
- Max height 3000mm
- Overall length 6000mm
- Unladen weight 16100KG
- Total weight (inc load) 27100KG

Applications and advantages

- The Hitachi EG110R tracked dumper is perfect for large sites with very wet terrain.
- 360° rotation allows efficient loading and dumping in all directions.
- Rubber tracks minimise ground damage.

Ideal for use on:

- Lake projects/restoration
- Nature reserves/SSSI's
- National Parks/AONB's
- Heritage sites
- Golf courses
- Large scale sites
- Agricultural land
- Flood defence
- Sites with wet ground conditions
