

Hitachi EG70R 360° Rotate 10 tonne Tracked Dumper

Key points:

- 360 degree rotate
- 10 tonne carrying capacity
- Scow end skip body
- Rubber tracks
- Ground pressure when fully laden only 4.6 PSI

Technical info:

- Total width 2500mm
- Max height 2870mm
- Overall length 5400mm
- Unladen weight 10800KG
- Total weight (inc load) 17300KG

Applications and advantages

- The Hitachi EG70R tracked dumper is perfect for large sites with very wet terrain.
- 360° rotation allows efficient loading and dumping in all directions.
- Rubber tracks minimise ground damage.

Ideal for use on:

- Lake projects/restoration
- Nature reserves/SSSI's
- National Parks/AONB's
- Heritage sites
- Golf courses
- Large scale sites
- Agricultural land
- Flood defence
- Sites with wet ground conditions
